

Proven traditions pay off...

CLASSICO

CLASSICO ropes are the classics among the Fatzner ropeway ropes. They are equipped with a continuously lubricated fibre core made of polypropylene, providing high elasticity and flexibility and ensuring the durability of the rope. The strands are embedded in the fibre core, the maintenance expenses are calculable thanks to the clear elongation.

CLASSICO ropes are used around the world as hauling ropes in reversible systems and as carrying-hauling ropes in chair and surface lifts.
